

IMPACT MESH

VIBRANT COLORED OUTDOOR MESH

Impact Mesh banners make a colorful statement and are perfect for outdoor use because of their unique construction.

Impact Mesh banners are made with a breathable mesh to allow airflow. Because of this special design, they are a great solution for applications in areas where winds and elements would normally get the best of other banner products.

POPULAR USES

- Colorful windscreens
- Stadium and bleacher wraps
- Event and stage backdrops
- Barricade or event fencing covers
- Construction or building renovation wraps

ADVANTAGES

- Bright, full-color high resolution graphics
- Vast creative potential with choice of unlimited background colors
- Long lasting, UV protected material designed for outdoor use
- Banners can be simply cleaned with soap and water or hosed off
- Huge outdoor graphics of any size really make a statement
- Lightweight material provides less wind resistance and is easy to install

IMPACT MESH 360™

DOUBLE-SIDED OUTDOOR MESH

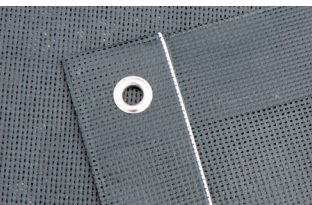

FRONT: FULL-COLOR GRAPHICS

BACK: PLAIN OR FULL-COLOR GRAPHICS

For additional branding, promotional and sponsorship opportunities, turn to Impact Mesh 360™. Impact Mesh 360™ turns fences and other areas into large outdoor graphics that make a statement to customers, fans and your community. Impact Mesh 360™ breaks the “normal” mesh barrier with full color, two-sided graphics that doesn’t allow the image from the other side to bleed through. This allows you to print on both sides of the banner without hanging banners back to back or sewing banners together to get a high-quality image on each side.

This wind-permeable, weather-resistant material can be used for your next event as a crowd barricade or to hide construction and renovations. It is a great outdoor advertising medium as well. Impact Mesh 360™ can be created in any size to fit the dimensions of your fencing, bleachers, building or facility project.

EXCLUSIVE X-TREME SEAM™ FINISHING

Our exclusive X-Treme Seam™ process is used to finish the edges of our Impact Mesh products. Our finishing experts understand the proper heat and pressure required to produce the strongest hem in the industry without adding additional cost

to your project. Source One Digital’s X-Treme Seam™ process comes “standard” when producing Impact Mesh graphics and does not use or require seaming tape or adhesives like our competitors. This exclusive process provides you with a banner that is easier to install and one that will last longer under extreme conditions than most any other product on the market.

POPULAR USES

- Custom designed or branded windscreens and privacy screening
- Single or double-sided banner placed even in windy locations
- Security or barricade screening and covers
- Sports facility branding and signage

ADVANTAGES

- Image on each side is not visible from the other side
- Eliminates the need for hanging two graphics back-to-back or sewing two graphics together
- Unlimited image size or repeat pattern
- UV protected material that lasts for years

Custom Printed Graphics

MAKING YOUR IMAGE OUR PRIORITY SINCE 1996!
