

FRAME OPTIONS.

visiFLEX frame systems are simple, versatile and, cost effective to use. The frames can be assembled in just a few easy steps and come in a range of profiles, styles, or custom colors.

Building and installing is as easy as 1, 2, 3

Start by pushing silicone bead into frame at corners

Work from the middle to the edges simply by pushing bead into frame

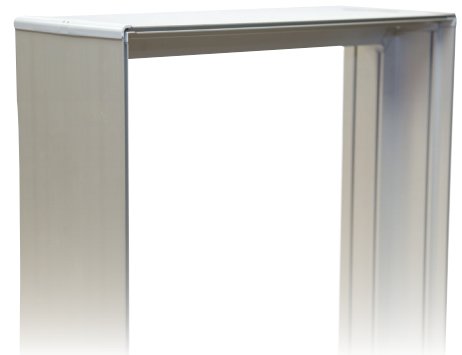

BACKLIT FRAMES.

This system uses high powered LED lighting. These are easy to install, do not require an electrician, and use up to 60% less electricity than traditional backlit displays.

SINGLE-SIDED BACKLIT FRAMES.

- Single-sided 2.2 inch to 4.25 inch profile
- Several styles available depending on application
- LED lighting provides bright, even illumination with no hot spots
- Lighting is easy to install, no electrician needed
- Mounting options including wall mount, ceiling hung, or free standing
- Satin silver finish available

DOUBLE-SIDED BACKLIT FRAMES.

- Double-sided 7.9 inch profile
- Display the same or different graphics on each side
- Ideal for use as a freestanding lightbox
- Two sturdy feet provide bottom required stability
- LED lighting provides bright, even illumination with no hot spots
- Lighting is easy to install, no electrician needed
- Satin silver finish available

NON-BACKLIT FRAMES.

These sturdy aluminum frames are easily assembled using a simple connector system. Using the system and accessories you can build any shape or size you can imagine.

SINGLE-SIDED FRAMES.

- Single-sided .8 inch to 1.25 inch profile
- Several profiles available
- Most popular style of SEG frame
- Many different mounting options including wall mount, ceiling hung, or free standing
- Satin silver finish standard, or for some profiles matte black

DOUBLE-SIDED FRAMES.

- Double-sided 1.6 inch profile
- Display the same, or different graphics on each side
- For freestanding or ceiling suspended graphics
- Two sturdy bottom feet provide freestanding stability
- Satin silver finish standard, or for some profiles matte black

PICTURE FRAME PROFILE.

- Traditional picture frame beveled edge
- Single-sided 1.25 inch profile
- Wall mounting hardware provided
- Satin silver, or matte black finish

ALSO AVAILABLE (not shown) ULTRA THIN FRAME.

- Single-sided .625 inch profile
- Slimmest profile available
- Suited for wall mounting
- Satin silver finish available

Create 3D shapes and forms including curved stand suspended structures using our unique profiles.
