MATERIAL OPTIONS

Our stock wallpaper is DreamScape commercial grade, Type II. This collection includes your choice of smooth, textured, and metallic finishes. These are made to withstand use in high traffic/public areas such as hotels, hospitals, office, and retail buildings. Other brands of wallpaper are available upon request.

TEXTURES

We offer 14 unique textured vinyl surfaces all optimized with a white point for superior inkjet imaging. Our lineup includes Suede, Smooth, Mystical, Bondi Sands, and other top selling classics.

SPECIAL EFFECTS

Our Special Effect items range from the award-winning Bling, which has eye catching sparkling metallic beads, to effective patterns that create one-of-a-kind wallcoverings that are extremely reflective and interactive with the viewer.

FLASH SERIES

With the Flash Series, we can create a modern, high-end look with brilliant silver chrome, copper, bronze, black, gold, and iridescent colors. Your graphics can also be designed with “drop outs” to create a highly reflective base adding dimension, emphasis, or sparkle to the design.

SATARA COLLECTION

The Satara Collection combines a unique embossed surface with a proprietary pearl coating. The result is a more subdued, yet highly sophisticated and luxurious sheen that looks and feels like fabric.

SUSTAINABLE

In addition to the industry-leading wallcovering Terralon, our offerings include five different “earth intelligent” wallcovering patterns. These feature PVC-free materials, items with post-consumer recycled content, and lightweight breathable substrates. Certain materials can qualify for LEED certification credits as well and are Class A, UL Certified, and NFPA approved.

YOUR DESIGN OR OURS

Our professional design team is ready to turn your vision a reality. Whether you have an image already, want a completely custom design, or somewhere in between, we'll ensure your message and graphics make an impact.

INSTALLATION

Need help with installation? Our team of professional installers can arrange your printed pieces to transform any space into an exciting visual experience.
